Education

B.Tech – Computer Science Engineering (AI/ML)

IMSEC College

2023 – 2027 (Expected)

Technical Skills

Languages: Java, JavaScript, Python (basic)

Web Development: HTML, CSS, React (learning), Tailwind

Backend: Spring Boot (learning)

Database: MySQL

Tools: Git, GitHub, VS Code

Concepts: Data Structures, OOP, REST APIs

Projects

Developer Portfolio Website

Built a personal portfolio website to showcase projects and skills using HTML, CSS, and React. Implemented responsive design for mobile and desktop.

URL Shortener (Full Stack Project)

Developed a URL shortening service similar to Bitly using React for frontend and Spring Boot for backend. Implemented REST APIs and database storage.

Portfolio Builder (Planned Project)

A web application where developers can generate portfolio websites automatically by entering their details and projects.

Coursework

Data Structures and Algorithms

Computer Networks

Software Engineering

Software Project Management

Achievements

Solved coding problems on LeetCode and actively learning full-stack development.

Career Objective

Motivated B.Tech CSE (AI/ML) student seeking opportunities to apply programming and problem-solving skills in software development and build impactful real-world applications.
